

FIS 2008

16.00 – 17.00 WEDNESDAY 3 DECEMBER

WORKSHOP: Interactive management of filamentous fungal infections

Host:
BSMM

Aim & learning objectives:

- Aim:** To discuss the management of fungal infections, with emphasis on pharmacokinetics, diagnostic and treatment strategies.
- Objective:** To consider antifungal treatment strategies, taking into account compartmental pharmacokinetics; to discuss the use and potential use of mycological and other diagnostic methods in systemic fungal infection; to consider how to answer unanswerable questions.
-

Format:
2 x 30 min. interactive case presentations (keypads)

Presentations:

- ONE:** Disseminated fungal infection in a renal transplant patient
Dr Silke Schelenz, Consultant Microbiologist and Honorary Senior Lecturer,
Norfolk & Norwich University Hospital
- TWO:** Disseminated fungal infection in a liver transplant patient
Dr Richard Hobson, Senior Lecturer & Honorary Consultant Microbiologist, Leeds Teaching
Hospitals NHS Trust

Proposed audience:

Trainees and consultants in ID, Microbiology and any specialties in which disseminated fungal infection is relevant.
